

*The Organizing Committee of the 4th SEE SDEWES2020 Conference
Association of Consulting Engineers of Bosnia and Herzegovina
Put života BB, Sarajevo, Bosnia and Herzegovina
SDEWES Centre
Ivana Lučića 5, Zagreb, Croatia*

Dear colleagues,

We hope that you are well and more than anything we hope this worldwide COVID-19 situation will soon return to normal as possible. While we are waiting on this, it is always beneficial to look forward to some of the planned events in the future. One of them is the 4th SEE SDEWES Conference, that is **confirmed to take place as planned**, from June 28 to July 02 in Sarajevo this year. For now, it will most likely be held in the form of a hybrid conference, partly on-site in hotel Europa in Sarajevo, and partly online, through a virtual conference platform for those who will not be able to attend the conference in person.

Either way, the event will take place and so will the scientific discussions on the most important topics of sustainable development of energy, water and environment systems. We are looking forward to your contributions in the field, with particular focus on the region and our mutual problems and possible solutions for the future. We need these solutions now more than ever, on a global and regional level as well.

The conference is now also offering online fees for all category types www.sarajevo2020.sdewes.org/conference-fee. Authors that settle the online fee now will ensure the presentation of their archival papers and the option for possible publication in conference partner journals. They will also have the option to pay the difference to regular fee, if they later on decide to attend the conference in person. Registrations for archival fees is still opened to authors from Bosnia and Herzegovina and so is the possibility for reduced fees for regular on-site fees.

Deadline for settling the fee for conference papers is June 2, 2020.

Deadline for settling the fee for archival papers is May 08, 2020.

Sincerely yours,

Prof. Tarik Kupusović, Conference Chair

Prof. Neven Duić, Conference Co-Chair
